

## FST-12SP-037

### 12-Fiber Hinged Splice & Splitter Tray for Micro PLC Splitter

#### Application

- For use with GJS-H2201 Fiber Optic Splice Closure.

#### Features & Benefits

The P037 is a compact, multi-functional management tray designed to integrate high-density fiber splicing and Micro PLC Splitter housing within a minimal footprint. It provides an efficient "Splice + Split" solution for FTTH and PON network deployments where space-saving and accessibility are prioritized.

- **Integrated Hybrid Management:** Features 6 specialized splice slots for up to 12 FO single fusion and a dedicated slot for housing a 1x4 or 1x8 Micro PLC splitter.
- **Hinged Access & Scalability:** The hinged stacking design allows for independent "book-like" flipping, ensuring easy access to any individual splice or splitter without disturbing adjacent fibers or trays in the stack.

#### Specifications

| Part No.               | FST-12SP-037                |
|------------------------|-----------------------------|
| Access Type            | Hinged                      |
| Splice Capacity        | 6 / 12 Fibers               |
| Splicing Method        | Single Fusion               |
| Splitter Capacity      | 1 pc (either left or right) |
| Splitter Type          | 1×4 /1×8 Micro PLC Splitter |
| Dimensions (H × W × H) | 113 × 93 × 10.5 mm          |
| Fiber Bend Radius      | ≥30mm                       |
| Material               | ABS or PC+ABS               |
| Sleeve Compatibility   | 40 - 45 mm                  |
| Tray Cover             | Transparent                 |
